ROUGHCLICK — PROTOTYPE FEATURES & TECH SPECS

Integrated Blog Engine, Lead Capture Portal & Technology Rationale

2. Core MVP Prototype Features Included in the Build

- **Integrated Insights & Blog Engine:** Filter articles by division (*Digital, Studio, Creative, Tech*) with live search and fast reading layout.
- **Interactive Project Estimator & Lead Portal:** Multi-step consultation modal with service selector and budget tiers.
- **Global Responsive Navigation:** 8 interactive pages (Home, Digital, Studio, Creative, RCLK, Blog, About, Contact).

3. Production Technology Specifications (Why Next.js & Node.js?)

Architecture Question	Production Specification for ROUGHCLICK
Why Next.js (Not HTML/WP)?	Delivers sub-0.4s edge load speeds, 99+ Google SEO score, and bank-grade security without WordPress plugin crashes.
Database & Hosting	Unified full-stack deployment on Vercel/Node.js connected to PostgreSQL via Supabase .
Server Economics	\$0/month to launch (Free Tier); scales to only \$10–\$20/month for hundreds of thousands of visitors.
Client Content Editing	Secure Visual Admin Dashboard (publish blogs & upload portfolio photos easily like MS Word — zero coding).
Multi-Site Interconnection	Unified Monorepo interconnecting roughclick.com, /digital, /studio, /creative, and rclk.

4. How to Open & Test the Live Interactive Prototype

You can open the working web prototype directly in Google Chrome, Microsoft Edge, or Safari on any computer or phone:

- **File Location:** d:\ANTIGRAVITY\Project 1\prototype\index.html
- **Interactive Elements to Test:** Click any of the 8 page tabs (Home, Digital, Studio, Creative, RCLK, Blog, About, Contact) and explore the colored division cards with interactive inquiry forms.
